Great Aspirations

Both the processing and the uses of information are undergoing an unprecedented technological revolution. Not only are machines now able to deal with many kinds of information at high speed and in large quantities, but it is also possible to manipulate these quantities so as to benefit from them in new ways. This is perhaps nowhere truer than in the field of education. One can predict that in a few years, millions of schoolchildren will have access to what Philip of Macedon's son Alexander enjoyed as a royal prerogative: the services of a tutor as well-informed and as responsive as Aristotle.

Patrick Suppes
Scientific American
October, 1966

Great Expectations

- ◆ Film
- ◆ Television
- ◆ Mainframe Computers
- ◆ Microcomputers
- ◆ Courseware
- ◆ Internet / Web

Déjà Vu?

For better or worse, television dominates much of American life and manners....Part of [the] lackluster record of the educational uses of television is of course due to the heretofore merciless economies of the medium. But profound pedagogic mistrust of the medium also remains a fact of life. The proof of the pudding lies in the fact that on many campuses, fancy television equipment...now lies idle and often unused.... Academic indifference to this enormously powerful medium becomes doubly incomprehensible when one remembers that the present college generation is also the first television generation.

PLANNING AND POLICY ISSUES

Myths and Misunderstandings

- ◆ Clicks replace bricks
- ◆ Content is king
- ◆ Technology fosters instructional and institutional productivity
- ◆ Distance learning is easy, inexpensive and profitable

The Technology Conundrum in Higher Education

Kenneth C. Green
The Campus Computing Project

Continuing Challenges

- ◆ Instructional integration & user support
- ◆ Assessment
- ◆ IT access and ISP services
- ◆ Reward and recognition
- ◆ Infrastructure: strategic & financial planning
- ◆ Multiple dimensions of the “digital divide”
- ◆ Unbundled educational offerings

Issues Seeking Resolution

- ◆ Exploding demand for distance and distributed learning
- ◆ New providers and competitors
- ◆ Angry consumers, parents & corporate sponsors
- ◆ eCommerce & eService
- ◆ Assessment and outcomes

The Technology Conundrum in Higher Education

Kenneth C. Green
The Campus Computing Project

Faculty Visualization

- ◆ *Institutional Vision: we will do this.*
- ◆ *Individual Visualization: I can do this!*
- ◆ Infrastructure fosters innovation

The Productivity Conundrum

- ◆ Quantity
- ◆ Quality
- ◆ Who Decides?

The Technology Conundrum in Higher Education

Kenneth C. Green
The Campus Computing Project

The Distance Learning Conundrum

- ◆ Mission & mandates vs. markets
- ◆ Unbundled services
- ◆ Overhead and development costs
- ◆ “Appropriate” technology
- ◆ Infrastructure
- ◆ Reimbursement vs. revenue and profits?

Change the Focus

eService

The Technology Conundrum in Higher Education

Kenneth C. Green
The Campus Computing Project

Assessment

- ◆ Benign neglect
- ◆ Ambiguous research
- ◆ Incomplete data
- ◆ Double standards

State Policy & Planning Issues

- ◆ Mission and mandates
- ◆ Access
- ◆ Infrastructure
- ◆ Sustained funding
- ◆ Cartel development & mgmt.
- ◆ Institutional subsidy & reimbursement
